

Usa le linee numerate per rispondere alle domande.

Risposte

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{6}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{4}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{4}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{3}$?

- 5) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{4}$?

- 6) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{2}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{6}{6}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{2}$?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

Usa le linee numerate per rispondere alle domande.

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{6}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{4}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{4}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{3}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{6}{6}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{2}$?

**Risposte**

1. $\frac{2}{3}$

2. $\frac{2}{8}$

3. $\frac{4}{8}$

4. $\frac{2}{6}$

5. $\frac{2}{2}$

6. $\frac{4}{8}$

7. $\frac{2}{2}$

8. $\frac{3}{6}$
