

Usa le linee numerate per rispondere alle domande.

Risposte

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{3}{6}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{4}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{4}$?

- 5) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{3}{3}$?

- 6) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{6}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{6}$?

1. _____
 2. _____
 3. _____
 4. _____
 5. _____
 6. _____
 7. _____
 8. _____

Usa le linee numerate per rispondere alle domande.

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{3}{6}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{4}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{4}$?

- 6) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{6}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{6}$?

**Risposte**

1. $\frac{1}{2}$

2. $\frac{8}{8}$

3. $\frac{1}{2}$

4. $\frac{1}{2}$

5. $\frac{6}{6}$

6. $\frac{2}{3}$

7. $\frac{2}{4}$

8. $\frac{1}{3}$
