

Determina in quale quadrante si collocano le coordinate date.

**Risposte**Es. 4 1 3 2

Es) (17 . -17)                      (17 . 17)                      (-17 . -17)                      (-17 . 17)

1) (10 . -2)                      (-10 . 2)                      (10 . 2)                      (-10 . -2)

2) (14 . 9)                      (14 . -9)                      (-14 . -9)                      (-14 . 9)

3) (17 . -17)                      (-17 . 17)                      (-17 . -17)                      (17 . 17)

4) (-15 . 6)                      (15 . -6)                      (15 . 6)                      (-15 . -6)

5) (7 . -9)                      (7 . 9)                      (-7 . -9)                      (-7 . 9)

6) (11 . 15)                      (-11 . -15)                      (11 . -15)                      (-11 . 15)

7) (6 . -8)                      (-6 . 8)                      (6 . 8)                      (-6 . -8)

8) (-14 . 12)                      (14 . 12)                      (14 . -12)                      (-14 . -12)

9) (-9 . 11)                      (-9 . -11)                      (9 . 11)                      (9 . -11)

10) (-15 . 11)                      (-15 . -11)                      (15 . 11)                      (15 . -11)
